

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's privacy law has reduced the amount of solicitation calls to paractically zero. I may have received one call in 4-5 months. I am very greatful for this peace. I used to get calls until 10 pm or later. Since I go to bed around 8:00, this was extremely irritating, as you can imagine.

I DON'T want to get calls from ANYONE, not even if they consider me their customer. If I am looking for any kind of service, I will make the effort to find them. I don't want to do business with anyone who calls and bothers me!!
